

## **TERMS AND CONDITIONS**

The treatment plan requested by me and developed by Illusion Aligners includes tooth movements that possess limited clinical predictability. As such, the actual clinical outcomes may vary from the projected results depicted in the treatment simulation.

I fully understand and confirms that, based on my specific request and guidance, a customized treatment plan involving complex and less predictable tooth movements has been designed by Illusion Aligners. I acknowledge that the clinical outcomes may differ from the anticipated results illustrated in the treatment plan.

I accept full responsibility for the clinical decisions made in the treatment plan, which were based on a thorough evaluation of the patient's needs.

I acknowledge and understands that the inclusion of tooth movements with limited predictability may result in clinical challenges in achieving the intended treatment objectives. Accordingly, multiple refinement stages and an extended treatment timeline may be necessary. Additionally, adjunctive therapeutic approaches such as the use of micro implants, elastics with buttons, or hybrid therapy involving a combination of aligners and fixed appliances (braces)-may be required to attain the desired clinical outcomes.

I fully acknowledge that orthodontics, as a discipline, is inherently dependent on a wide range of biological, anatomical, and behavioral variables, and that treatment outcomes may vary significantly among individuals. Given this variability, I recognize that the practice of orthodontics is not an exact science, and that absolute treatment outcomes cannot be predicted or guaranteed.

I understand and accept that the Illusion Aligners functions strictly as a manufacturer and provider of orthodontic devices and services and does not engage in the practice of medicine, dentistry, or any form of direct patient care. Illusion Aligners does not, and is not authorized to, provide medical or dental diagnoses, treatment recommendations, or clinical decision-making.

I acknowledge that any future modifications to the plan will require reassessment and my approval. Significant changes may require a revised consent process. I understand that Illusion Aligners is not responsible for clinical challenges or unexpected outcomes resulting from the customized nature of the plan.
