

ILLUSION  
Aligners

Catch Them **Young.**  
Watch Them **Grow.**

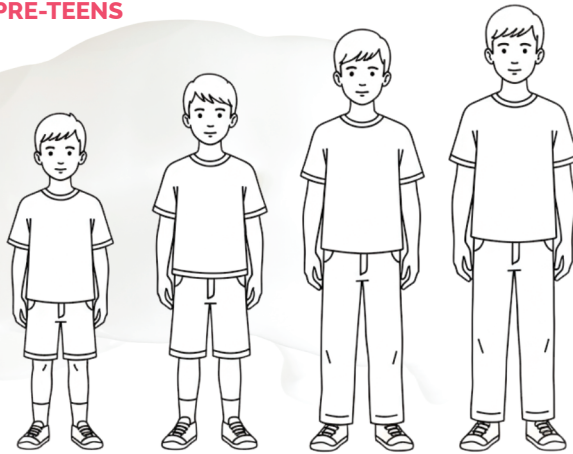

The single innovation that's rewriting  
the rules of early orthodontic treatment

An orthodontic solution  
**exclusively** for **PRE-TEENS**

## Designed with Growing Needs in Mind

Exclusively for **PRE-TEENS**

## Personalised Orthodontic Appliance

Supporting through growing years & beyond

### The PEOT System

**PEOT** is a personalised orthodontic appliance supporting healthy dento-facial growth and development in children aged 6 years and above, with the flexibility to begin even earlier in suitable cases.

## Early Intervention for Long-Term Benefits

### What's the PEOT Advantage?

A cross-disciplinary silicone appliance, **PEOT** sets a new benchmark by transforming early orthodontics with personalisation, precision and modern manufacturing practices.

### Holistic Impact

Utilises a multifaceted approach to bring myofunctional, dentoalveolar and targeted dental alignment corrections.

#### ● Arch Development & Staged Progression

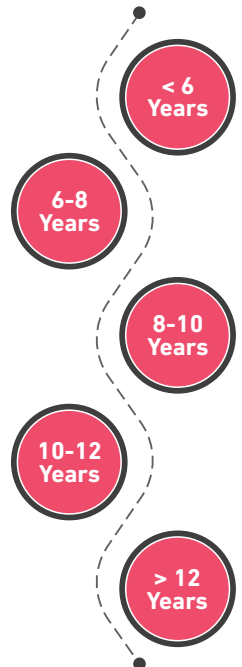

- ✓ Supports natural arch development through a series of orthodontic appliances designed to relieve crowding and correct bites.

#### ● Functional Habit Coaching

- ✓ Improves lip seal, tongue posture and encourages nasal breathing.

#### ● Myofunctional Effect

- ✓ Encourages the correction of dentofacial malrelationships.

## Orthodontic Innovation Designed for Comfort & Convenience

### Revolutionary Design

Unlike traditional silicone appliances, **PEOT** is **custom-made for each child as per their unique anatomical requirements**, ensuring a precise fit and comfortable wear experience.

- **Flexible Wear Schedule:** 2–6 hours per day with night-time as needed, split into short 15–30 minutes or 45 minute–1-hour sessions for easy compliance.
- **Treatment Duration:** Typically, 12–18 months.

### Treatment That Fuels Your Success

#### PEOT Can Change Your Practice

- **Expand Your Options:** Treat children from an early age, with the highly favoured age group being 6–12 years.
- **Grow Your Practice:** Attract new patients and boost clinical revenue with high-quality personalised treatment.

### Ideal Cases for PEOT

- Preventive/mixed dentition treatment (late deciduous to early permanent teeth).
- Mild to moderate crowding, oral habit cases, and Class II/III malocclusions where conventional appliances are inappropriate.
- Crossbites & myofunctional cases.

### Here's Everything You Need to Begin Treatment

- **Accurate Diagnostics:** OPG, lateral cephalogram, intraoral scans, and extraoral photos/videos.
- **Comprehensive Case Insights:** Case history and assessment form.

# PEOT vs Traditional Appliances

## PEOT – Personalised Early Orthodontic Treatment

Caters to the unique orthodontic needs of a broader age group

Personalised for every child

Comfort-focused design that improves compliance

A holistic solution that sets a new standard in early orthodontics

## Traditional Appliances

Generic, preformed designs, not optimised for unique orthodontic needs

One-size-fits-all approach

Often uncomfortable, leading to poor compliance

Narrow application
